How to Sew with 3D Foam

3-D Foam is available in 2-6mm thicknesses. The designs shown were sewn using 3mm foam. The thicknesses you choose depends on the effects you wish to create.

Spray adhesive should be used to hold the foam in place and sewing tensions loosened to keep from compressing the foam.

The color change sequence indicates when to "apply" and "tear" the foam away. Do this slowly so material won't loosen in the hoop.

Each foam section uses a color change to sew an "outline" to indicate foam placement. After the outline has sewn, cover the outline with foam and start the next color.

The color of foam used should closely match the outside column of the design. This helps eliminate the foam showing through the column when torn away.

Dakota Collectibles does NOT recommend sewing 3-D designs without using foam.
